DETAILED ACTION

1. This office action is in response to amendment filed on March 11, 2005. *Claims 1-11* are now pending in the application with *claims 8 and 9* drawn to a non-elected invention.

2. Applicant's amendment filed on March 11, 2005 has been fully considered with the following results. In view of the arguments, rejection of *claims 1-7* under 35 U.S.C. 102(b) as anticipated by Whitbourne (US 5,001,009) is withdrawn and rejection of *claims 1, 2, 5, 6* under 35 U.S.C. 102(b) as anticipated by Miller et al. (US 5,300,394) is also withdrawn. However, rejection of *claims 1-7* under 35 U.S.C. 102(b) as anticipated by Nishi et al. (US 5,611,850) is sustained and rejection of *claims 1, 4, 5* under 35 U.S.C. 102(b) as anticipated by Ishibashi et al. (US 5,554,489) is also sustained.

Allowable Subject Matter

3. *Claims 10 and 11* are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Instant claims recite an over-coating agent containing a water-soluble polymer, a water-soluble fluorine compound and a water-soluble amine. Prior art does not teach or suggest the use of water-soluble amine in the coating compositions applied on photoresist layers.

Response to Arguments

4. Instant claims are directed to an over-coating agent containing water-soluble polymer and a water-soluble fluorine compound. The prior art to Nishi et al. Ishibashi et al. concern antireflective compositions applied over photoresist layers for fine resist patterns. Such antireflective coatings are subsequently removed substantially and may be subjected to post-exposure baking (column 6, lines 26-51).

5. As stated in paragraph 3 of the earlier office action, the preamble with the process steps is not given patentable weight and the over-coating agent containing water-soluble polymer and a water-soluble fluorine compound is treated as a composition claim. The over-coating agent as claimed instantly reads on prior art antireflective compositions that are fully capable of the recited thermal shrinkage under heat.

6. If the preamble were to be given patentable weight as implied in applicants' arguments, then it would potentially raise the issue of hybrid claim. A single claim that claims both an agent and the method steps of using it is indefinite under 35 U.S.C. 112, second paragraph. See Ex Parte Lyell, 17 USPQ 2d 1548 (Bd. Pat. App. 7 Inter.1990). Such claims would also be rejected under 35 USC 101, because the claim embraces or overlaps two different statutory inventions.

Action Is Final

Art Unit: 1713

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
